DETAILED ACTION

1. Applicant's claims submitted 2/7/2007 are compliant to the requirements of 1.173(g).

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul Kravitz on 4/27/07.

The application has been amended as follows:

In amended drawings 2 and 7 the word "(AMENDED)" has been placed below the figure number to comply with MPEP 1413.

Response to Amendments / Arguments

3. Applicant's arguments regarding the declaration of 9/15/06, are convincing, the declaration is acceptable.
4. Applicant's amendments to the claims overcome the recapture rejection.
5. The original patent has been surrendered and is artifact file 09654929za.
6. New corrected drawings in compliance with MPEP 1413 have been received for figures 2 and 7.
7. A discussion of the support in the specification for all functions of all the new claims has been provided as required by 37CFR 1.173(c), and is acceptable.

Allowable Subject Matter

8. Claims 1-41 are allowable over the prior art.

9. The following is an examiner's statement of reasons for allowability:

As per Claims 1, 4, 6, 7.

The prior art of record, specifically, Arnold et al (176) in view of Hartman Jr ('166) does not disclose:

a software management means for decoding encrypted software data and for managing monetary charges according to the usage of the software data; and

output switchover means for receiving encrypted data from said input switchover means and outputting the encrypted data to said software management means, and for receiving non-encrypted software data from said input switchover means and outputting the non-encrypted software data to said data conversion section as claimed.

As per Claims 8, 12, 23, 24, 28, 39.

The prior art of record, specifically Shear ('598) in view of Allen ('713) do not disclose a switch means for switching a one-way connection between said digital information receiving means and said information converting means, said digital information receiving means and said drive means, and said drive means and said information converting means, as claimed.

As per Claims 16, 21, 22, 32, 37, 38.

The prior art of record, specifically Shear ('598) in view of Allen ('713) do not disclose first, second and third switches for switching a one-way connection between said digital information receiving means and said information converting means, said digital information receiving means and said drive means, and said drive means and said information converting means, as claimed.

As per Claim 20.

The prior art of record, specifically Shear ('598) in view of Allen ('713) do not disclose first, second, third and fourth switches for switching a one-way connection between said digital information receiving means and said information converting means, said digital information receiving means and said drive means, and said drive means and said information converting means, as claimed.

As per Claim 36.

The prior art of record, specifically Shear ('598) in view of Allen ('713) do not disclose first, second, third, fourth and fifth switches for switching a one-way connection between said digital information receiving means and said information converting means, said digital information receiving means and said drive means, and said drive means and said information converting means, as claimed.

Art Unit: 3628

As per Claim 40.

The prior art of record, specifically Shear ('598) in view of Allen ('713) do not disclose:

a fourth switch position which connects digital data read from the storage medium to a software management which decodes encrypted software data in the read digital data and then provides the decoded software data to the converter to be converted into at least one of visible and audible data, wherein the software manager manages monetary charges according to usage of the decoded software data; and

a fifth switch position which connects the digital data provided by the communication path to the software manager which decodes encrypted software data in the provided digital data and then provides the decoded software data to the converter to be converted into at least one of visible or audible data, wherein the software manager manages monetary charges according to usage of the decoded software data.

As per Claim 41.

The prior art of record, specifically Shear ('598) in view of Allen ('713) do not disclose:

means for connecting digital data read from the storage medium to a software manager which decodes encrypted software data in the read digital data and then provides the decoded software data to the converter to be converted into at least one of visible and audible data, wherein the software manager manages monetary charges according to usage of the decoded software data; and

means for connecting digital data provided by the communication path to the software manager which decodes encrypted software data in the provided digital data and then provides the decoded software data to the converter to be converted into at least one of visible and audible data, wherein the software manager manages monetary charges according to usage of the decoded software data.

The claims that depend from the above allowable claims are allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
